*The Technological Institute of Optics, Colour and Imaging (AIDO) is a private non-profit making company created in 1988 by the Valencian Parliament through the Small and Medium-Sized Enterprise Institute of Valencia (IMPIVA) with the aim of supplying technological solutions to companies through industrial optics.*

***aido** is a leading technology research, development and innovation centre in the fields of Graphic Arts, Audiovisual, Industrial Colourmetry, Optical Engineering, Laser, Ophthalmic Optics and Imaging. The wide versatility of optic technologies allows **aido** to work in various business sectors, acting as a specialised technological partner in R+D+I solutions that add a significant value added to our clients` processes and products.*

***aido** faces the future with more than a thousand associates and the recognition of the Nova award for “Innovation, Research and Training” for its work promoting and fomenting R+D+I in the company. Due to its commitment to improve the competitiveness of Spanish small companies, it is registered as a technological centre by the Comisión Interministerial Española de Ciencia y Tecnología (the Spanish Science and Technology Inter-ministry Commission). Moreover, it is also founding member of the Network of the Technological Institutes of the Valencian Region (REDIT) and member of the Federación Española de Entidades de Innovación y Tecnología (Spanish Technological Innovation Entities Federation) (FEDIT), among other national and international movements.*
